

# High Pines Norwich Terriers

[www.highpinesnorwich.com](http://www.highpinesnorwich.com)

## Puppy Health Record

Vaccinations given: Nobivac Canine 1-DAPPv given at 8 weeks

- Dewormed with Nemex 2 (Pyrantel pamoate) at 2, 4 and 6 weeks
- Treated with Albon at 7 weeks
- Revolution (selamectin) applied at 8 weeks to prevent fleas, heartworm, ear mites sarcoptic mange and ticks.

Please Vaccinate at:

**12 weeks** vaccinate with 5-way

**16 weeks** vaccinate with 5-way

**18-20 weeks** vaccinate for Rabies with Merial Imrab III

Some breeders have had very severe reactions including death when Norwich Terriers are given Leptospirosis vaccine, please DO NOT GIVE IT. Also, we do not recommend vaccinating for Lyme or Corona. Please do not vaccinate for Bordatella until at least 6 months of age if at all. Bordatella is only recommended for dogs with exposure to multiple dogs with unknown vaccination status. More information is included in puppy document in your folder.

We have done our very best to raise a healthy and happy dog, please contact us if you have any questions.
